Items for the Info Sheet should reach Anne (burnsa@mast.queensu.ca) by noon on Monday. The Info Sheet is published every Tuesday.

**Wednesday, May 14, 3:00 p.m. Jeffery 422**  
**Summer Number Theory Seminar**  
**Speaker:** M. Ram Murty  
**Title:** The Siegel-Klingen theorem revisited (continued)  
**Abstract:** I will review the rudiments of the classical theory of modular forms essential to the proof of the Siegel-Klingen theorem.

**Thursday, May 15, 10:00 a.m. Jeffery 422**  
**CYMS Seminar**  
**Speaker:** Andre Perunicic  
**Title:** Zeta Functions of Certain Fermat Quotients  
**Abstract:** I will talk about how to compute congruence zeta functions associated to quotients of Fermat surfaces arising from mirror symmetry.

**Speaker:** Alex Molnar  
**Title:** Modularity/Automorphy  
**Abstract:** We begin to discuss the modularity and/or automorphy of our new families of Calabi-Yau.
